React.js

Web Applications

Certifications

Become an AI Native Engineer with Spec-Kit, SDD, and Claude

The Complete AI Coding Course (2025) - Cursor, Claude Code

Abin A Khosh

Senior Software Engineer | Front-End Development | React.js, JavaScript, TypeScript | Angular, React Native | Responsive Web and Mobile Apps

Trivandrum, Kerala, India

Summary

I’m a Senior Software Engineer with 7+ years of experience building frontend features for web and mobile applications. My core strengths include React, JavaScript, TypeScript, responsive UI, and reusable component-based development, with additional experience in Angular and React Native.At InApp, I’ve contributed to products in child and family well-being, workforce learning, awards management, and internal asset management. My work includes developing and maintaining frontend features, integrating REST APIs, writing unit tests, resolving defects, and presenting client demos. I collaborate with backend developers and clients to clarify requirements, estimate work, and deliver changes.I’ve worked with Material UI, Formik, Yup, i18next, SignalR, Jest, React Testing Library, Azure DevOps, Jira, and Git. I also use GitHub Copilot and Claude to assist with code exploration, implementation, debugging, and test writing.Focus areas: Front-end engineering | React | JavaScript | TypeScript | Responsive applications | Web and mobile products

Experience

InApp

5 years 4 months

Senior Software Engineer

December 2022 - Present (4 years)

Thiruvananthapuram, Kerala, India

- Develop and maintain frontend features across client and internal applications.
- Mentor junior engineers and freshers, supporting their onboarding and technical development.
- Estimate tasks and contribute to sprint planning and delivery coordination.
- Review code and provide feedback on implementation and maintainability.
- Coordinate with backend developers and clients to clarify requirements and integrate changes.

- Write unit tests, resolve defects, and present client demos.
- Use AI coding tools to support code exploration, implementation, debugging, and test writing.
- Technologies: React, JavaScript, TypeScript, Material UI, Formik, Yup, i18next, REST APIs, Jest, React Testing Library, Git, Azure DevOps, Jira, SonarQube, Figma, GitHub Copilot, Claude.

Software Engineer
August 2021 - December 2022 (1 year 5 months)
Trivandrum, Kerala, India

- Developed and maintained frontend features for client and internal applications.
- Built React interfaces for workflows across ThriveWell, ReadySkill, the NASSCOM SME Inspire Awards Portal, and the internal asset management tool.
- Integrated frontend features with REST APIs and coordinated requirements with backend developers and clients.
- Wrote unit tests, fixed defects, and presented client demos.
- Technologies: React, JavaScript, TypeScript, Material UI, Formik, Yup, i18next, REST APIs, Git, Azure DevOps, Jira, SonarQube.

Xcubated Business Solutions
Software Associate
July 2019 - July 2021 (2 years 1 month)
Trivandrum, Kerala, India

- Develop frontend features for ATMA (Automatic Transition Management Application) using Angular 8, HTML, and CSS.
- Write unit tests, fix defects, and coordinate implementation with backend developers.
- Work on a web application using a Java Spring backend and MongoDB.
- Technologies: Angular 8, HTML, CSS, Git, Bitbucket.

Education

Govt. Engineering College, Barton Hill, Thiruvananthapuram
Bachelor of Technology, Information Technology · (August 2015 - July 2019)
